

STOCKR - Role Permission Matrix

Phase 1 · SQLite + SQL Alchemy · 3 Roles · 11 Tables

Legend

✓ Full access ✗ No access ● Partial / conditional access (note in cell)

All enforcement noted as 'service layer' is applied in application code, not in the database schema.

Action / Permission	Management	Restocker	Customer
AUTH & SESSIONS			
Create management account	✓	✗	✗
Create restocker account	✓	✗	✗
Create customer account	✓	✗	✓
Login (create session)	✓	✓	✓
Logout (close session)	✓	✓	✓
View own session history	✓	✓	✓
View all sessions (any user)	✓	✗	✗
Assign / change user roles	✓	✗	✗
Deactivate / delete users	✓	✗	✗
CATEGORIES			
Create category	✓	✗	✗
Read / browse categories	✓	✓	✓
Update category name / description	✓	✗	✗
Delete category	✓	✗	✗
ITEMS - READ			
View item name	✓	✓	✓
View item price	✓	✓	✓
View item location (aisle/shelf)	✓	✓	✓
View stock quantity	✓	✓	✓
View item category	✓	✓	✓
View brand	✓	✓	✓
View UPC	✓	✓	✓
View description	✓	✓	✓
View in_storage flag	✓	✓	✗
View deactivation reason	✓	✗	✗
View inactive / soft-deleted items	✓	✗	✗
ITEMS - WRITE			

Action / Permission	Management	Restocker	Customer
Create new item	✓	✗	✗
Update item details (name, price)	✓	✗	✗
Move item in_storage to floor	✓	🔒 flag update	✗
Soft-delete item (deactivate)	✓	✗	✗
Provide deactivation reason	✓	✗	✗
SALES			
Auto-log sale on stock decrease	✓	🔒 triggered	✗
Create manual sale entry	✓	✗	✗
Create correction sale entry	✓	✗	✗
View sales records	✓	✗	✗
View sales reports (daily/weekly)	✓	✗	✗
ORDERS (RESTOCK)			
Create restock order	✓	✗	✗
Add / remove order line items	✓	✗	✗
Mark order complete	✓	✗	✗
Cancel order	✓	✗	✗
View orders	✓	🔒 read-only	✗
INVENTORY ADJUSTMENTS			
Create adjustment (restock received)	✓	✓	✗
Create adjustment (damage/other)	✓	✓	✗
Create correction adjustment	✓	✗	✗
View all adjustments	✓	🔒 own only	✗
AUDIT LOG			
View field-level audit log (items)	✓	✗	✗
Write to audit log (system only)	✗	✗	✗
Delete audit log entries	✗	✗	✗
ACTIVITY LOGS			
View own activity log	✓	✓	✗
View all users activity logs	✓	✗	✗
Delete activity log entries	✗	✗	✗

Notes

* management: Full access across all tables. Only role that can create/update/delete items, manage users, view audit logs, run sales reports, and create restock orders. Can create accounts of any role.

- * restocker: Operational access only. Can log in, adjust stock (restock + damage), move items between storage and floor, and view orders. Cannot create accounts or access financials, audit logs, or user management.
- * customer: Read-only access to item fields: name, price, location (aisle/shelf), stock quantity, category, brand, UPC, and description. Can self-register a customer account. Cannot access any transactional or internal data.
- * Audit log and activity log entries are written exclusively by the service layer and are immutable. No role can update or delete them.
- * The 'auto' sales source is system-generated on stock decrease. No user action or role is required.
